PLOS Science Wednesday: Hi Reddit, we’re Madhu and Soumya and we are both researchers and advocates for tuberculosis research, as well as editors of the new PLOS TB Channel – Ask Us Anything!

PLOSCIENCEWEDNESDAY R/SCIENCE

Hi Reddit,
My name is Madhu Pai and I am the Director of Global Health at McGill University, and an Associate Director of McGill International Tuberculosis Centre. My research is mainly focused on improving the diagnosis and treatment of tuberculosis, especially in high-burden countries like India and South Africa. I am joined by Soumya Swaminathan, the Director General of the Indian Council of Medical Research (ICMR) and Secretary of the Department of Health Research for the Ministry of Health & Family Welfare in India. I am co-editing, with Soumya, the PLOS TB Channel. This channel features articles on all topics relevant to TB research. As editors, we aim to showcase the most up to date research to assist various stakeholders in the fight against TB, including academics, healthcare workers, policy makers, implementers, patients, and civil society.
I will be answering your questions about TB and the TB Channel at 1pm ET – Ask Us Anything!
Don’t forget to follow me (Madhu) on Twitter @paimadhu and follow Soumya @doctorsoumya.

The AMA is still in progress

PLOS Science Wednesday: Hi Reddit, we’re Madhu and Soumya and we are both researchers and advocates for tuberculosis research, as well as editors of the new PLOS TB Channel – Ask Us Anything! is still ongoing! After the AMA is finished it will be permanently archived, assigned a digital object identifier (DOI), and formatted as a white paper.

To learn more about The Winnower and publish your own ideas and research, sign up here! We bring traditional scholarly publishing tools (DOI & permanent archival) to blogs, essays, grants, protocols, how-to’s, essays, and other media, including reddit AMAs, because scholarly communication doesn’t just happen in scholarly journals.
