Here's a list of pollen I have looked at (with links to some detailed posts):

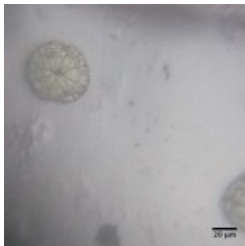

Eudicots

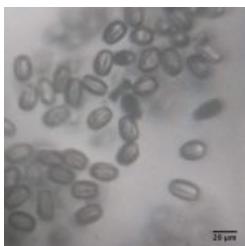

Pride of India (*Lagerstroemia speciosa*)

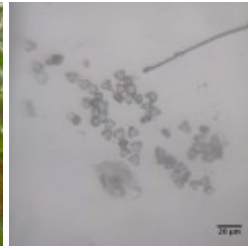

Poovarasi (*Thespesia populnea*)

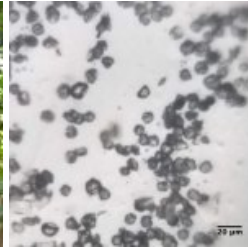

Thoonga Moonji (*Samanea saman* or *Albizia saman*)

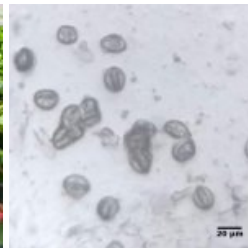

Neem (*Azadirachta indica*)

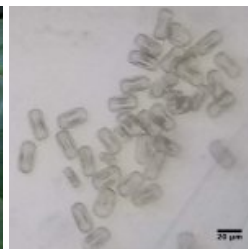

Jamun (*Syzygium cumini*)

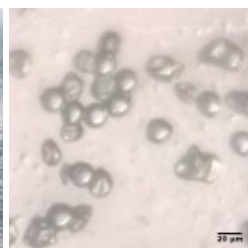

Thenpoochi Maram (*Guazuma ulmifolia*)

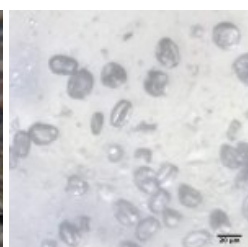

Ixora coccinea

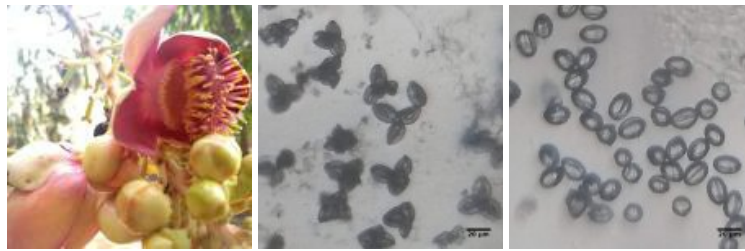

Desi Badam (*Terminalia catappa*)

Murangai (*Moringa oleifera*)

Papaya (*Carica papaya*)

Nagalingam (Couroupita guianensis): Dimorphic pollen!!

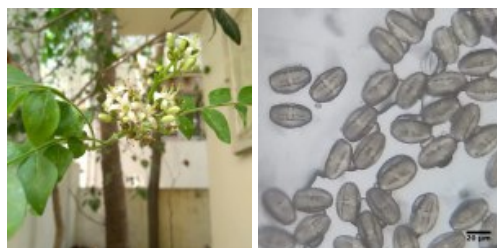

Unknown plant

Indian Laburnum (*Cassia fistula*)

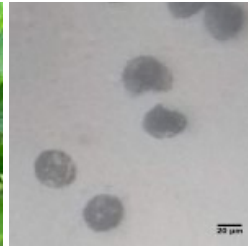

Temple Tree (*Plumeria* spp.)

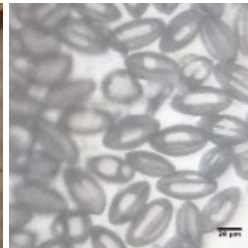

Karuvaipillai (*Murraya koenigii*)

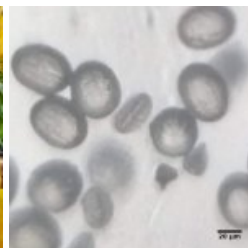

Copper Pod (*Peltophorum pterocarpum*)

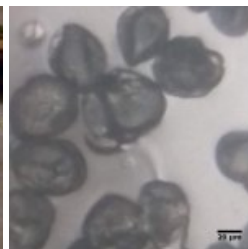

Bluemink (*Ageratum houstonianum*)

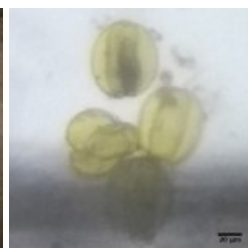

Tabebuia spp.

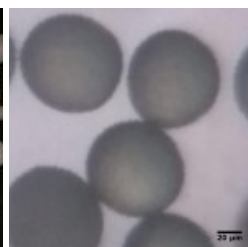

Golden Shrimp (*Pachystachys lutea*)

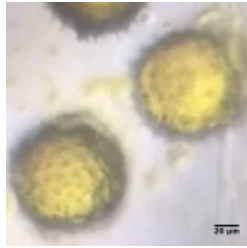

Kigelia africana

Peacock Flower (*Caesalpinia pulcherrima*)

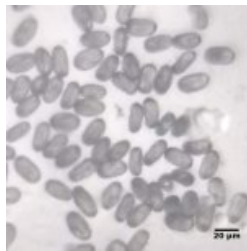

Bhramha Kamal (*Epiphyllum oxypetalum*)

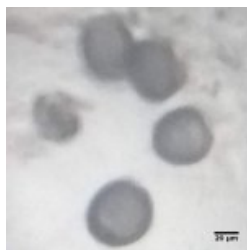

Pumpkin (*Cucurbita* sp)

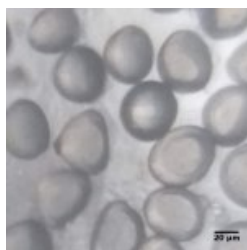

Monocots

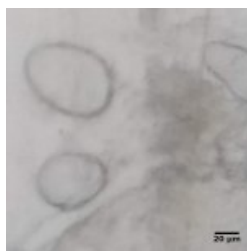

Peace Lily (*Spathiphyllum wallisii*)

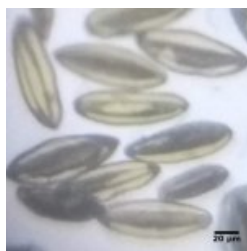

Coconut (*Cocos nucifera*)

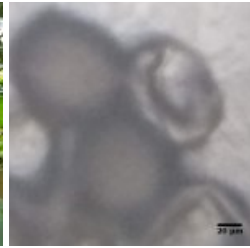

Hanging Lobster Claw (*Heliconia* spp)

Heliconia spp

Easter lily (*Amaryllidinae*)

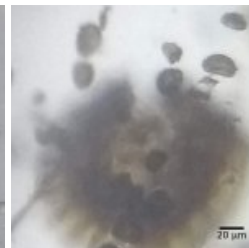

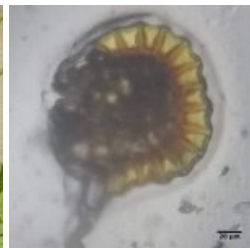

Insulin plant (*Chamaecostus cuspidatus*)

Vazhaipoo (*Musa* sp.)

Not exactly pollen, but at the cusp of alternating generations:

Unknown Fern (clade

Pteridophyta)

(Stay tuned: I will update this as we look at more alternation of generations....)

*Each of the image box is 200×200 microns and is calibrated by [the method detailed in this post](#).
