Twinning of our Foldscope project with students of Department of Biotechnology, Bundelkhand University

UMA CHAUDHRY

Training program entitled ‘Foldscope and its application’ organised at Bundelkhand University on 5th May 2018 as a part of foldscope project of Department of Biotechnology (DBT) India.

Coordinators: Dr. Uma Chaudhry and Dr. Rambir Sehrawat

Students of Department of Biotechnology, Bundelkhand University enthusiastically participated in a hands-on training program on ‘Foldscope and its application’ organised on 5th May 2018. We thank Dr. Rambir Sehrawat for giving us an opportunity to interact with his students wherein we could demonstrate various applications of foldscope. Students prepared slides for themselves and felt excited visualizing the slides under the foldscope. Sharing a picture and would be adding more pictures later. Some of the students would also be visiting our college Bhaskaracharya College of Applied Sciences, University of Delhi for getting trained in the project outcomes of Foldscope.
