We are indebted to students for their efforts and inputs to the foldscope training workshop to make it happen just after finishing their mid semester exams, and dispersing for a short break. In the series of workshops conducted under foldscope project, A two day workshop was held @ GGDSD College Chandigarh on 9th – 10th Oct. 2018. Students were made aware about foldscope, its assembly and practical utility was demonstrated on first day. The first day ignited the curiosity in them. They were overwhelmed after assembling, viewing samples, clicking photos on their mobile phones attached to Foldscope. A visit was planned for the second day.

Few Glimpses of first day:
